DESMOND MEHTA

+1 (516) 353-1373 | desmond.mehta@yale.edu | desmondmehta.com | linkedin.com/in/desmondmehta | github.com/dezash123

Education

Yale University — **New Haven, CT**
B.S.+M.S., Computer Science — Sep 2024 — May 2028
- Relevant coursework: Discrete Math, Systems Programming, Compilers, VLSI, Intensive Physics

Cold Spring Harbor High School — **Cold Spring Harbor, NY**
4.22 GPA, 1580 SAT — Sep 2020 — Jun 2024
- Relevant coursework: Linear Algebra, Multivariable Calculus, Physics C, 12× AP 5′s

Columbia University Science Honors Program — **New York, NY**
Weekend coursework in Relativity, Quantum Computing, and Materials Science — Sep 2022 — May 2024

Work

Head of Platform at Sea12 — **New York, NY**
Led full-stack development and deployment of our AI agent orchestration platform — Apr 2025 — Aug 2025

Research

Asynchronous VLSI & Architecture Group — **Yale University**
Designing silicon modules for inter-chip communication — Jan 2025 — Present

Bioelectronics Lab — **Feinstein Institutes for Medical Research**
Improved radio transmission protocol for rodent-implanted neural recording device — Jun 2024 — Aug 2024

Neural Acoustic Processing Lab — **Columbia Engineering**
MATLAB signal processing methods for minimally-invasive human neural implants — Jun 2023 — Aug 2023

Human Brain Mapping Lab — **Feinstein Institutes for Medical Research**
Python signal processing to study the role of Sharp Wave–Ripples in memory — Jun 2022 — Mar 2023

Activities

Yale Undergraduate Aerospace Association — **New Haven, CT**
CubeSat Architecture and Security Board Lead and Project Liquid Team Member — Sep 2024 — Present
- Leading migration of satellite codebase from C to C++ and planning of higher-level design paradigms
- Designing new STM32-based motherboard for liquid-fuel rocket; rewriting codebase in Rust

FIRST Robotics Competition — **Cold Spring Harbor, NY**
Build Captain, CAD Captain, Field Technician — Jan 2021 — Apr 2024
- Qualified for World Championship in 2023 and 2024
- Developed autonomous targeting system in addition to leading design in 2024

Lemelson-MIT InvenTeam — **Cambridge, MA**
Team Founder and Technical Lead — May 2023 — Jun 2024
- Designed and fabricated a cost-effective, environmentally-friendly, and scalable solution for tick mitigation
- 1 of 8 teams selected nationally for $7,500 grant, only team to win Microsoft Make What's Next grant

Projects

Watch: Building an esp32s3-based smartwatch using KiCAD, Onshape, and Rust
- Features: OLED touchscreen, laser pointer, flashight, motor, uSD, 2 mics, IMU, and SpO2+Heart Rate Sensor
- All drivers open-sourced and written in async Rust, as well as code and ECAD

Openwhisper: Open-source Superwhisper clone, written with Tauri (Rust and Svelte)

NHRL: Designed robots for and competed in the NHRL Combat Robotics Competition in 2023 and 2024

Drone: Designed, built, and programmed an rp2040-based FPV drone using KiCAD, Onshape, and Rust
- Wrote control systems and multiple drivers from scratch; codebase is 100% Rust

Congressional App Challenge: Developed an app to track water quality; 2023 Winner, District NY01

Experience

Languages: C, Rust, C++, Python, MATLAB, Java, Kotlin, Go, JS/TS, React, Svelte, PostgreSQL, CUDA, Nix
